

Technical Manager

TO: Board of Directors
Mike Fletcher, Executive Director
FROM: Nathan Hughes, Technical Manager
SUBJECT: July 2023 Update

- MICC Audio/Visual
 - We have chosen Logitech's AV equipment as the solution for the MICC AV needs. All the Logitech products were purchased from CDW-G.
- Facility
 - Another bidder has dropped out. We now have two companies interested in working with us and will continue working on getting a third bid.
- MAJCS
 - The MAJCS technical team increased the allocated CPU cores of the virtual servers to increase the performance of CAD as it continues to grow.
 - The MAJCS mobile user group has begun meeting once a month again. The current MDC software will be receiving a new user interface soon, and the user group will help guide the technical team in design/layout and available features.
